Kaltura Personal Capture

Get Started User Guide

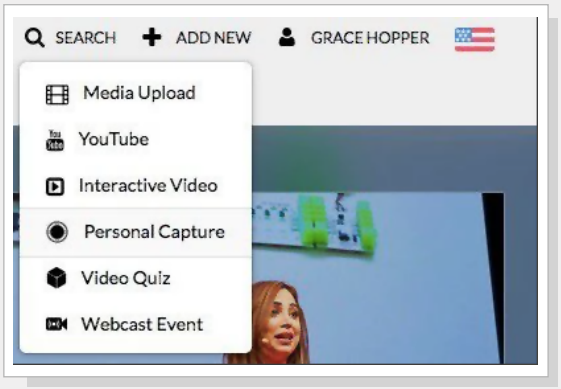

KALTURA

With Kaltura Personal Capture everyone is a creator! Kaltura Personal Capture has a simple and intuitive user interface that requires only one click to record, leaving behind any complex setup or lengthy learning curves.

Enabling Kaltura Personal Capture

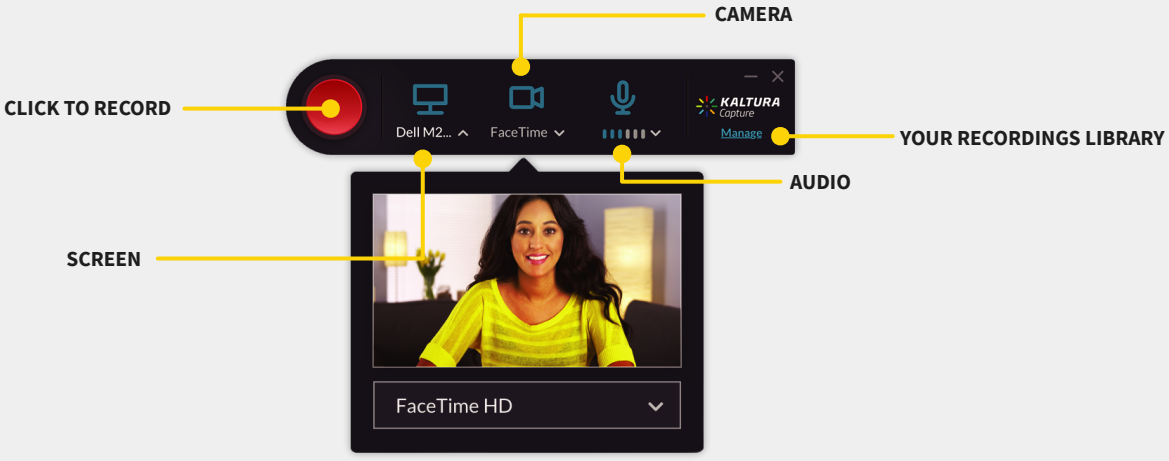

1. From the Add New menu, select Personal Capture
2. Download the installation file for Windows or Mac
3. Run the installation file to install Kaltura Personal Capture
4. Go back to the Add New menu and select Personal Capture again

The website will automatically identify that you already installed the application and will launch it within seconds

Getting Started

Kaltura Personal Capture enables recording your screen, webcam, or just audio. By default, all recording inputs are configured to the optimal quality available, so when you're ready, you can start recording! For information on how to modify the default recording inputs, go to Kaltura Personal Capture Recording Options.

With a seamless recording-to-viewing workflow, once you're done recording and hit upload, you'll be able to find your recording under 'My Media' in your Kaltura MediaSpace instance or Learning/Content Management System. Simply click on the entry link. Once there you can edit your entry using the Kaltura Video Editing Tools and enjoy all the advantages of Kaltura's rich platform.

For more information visit the Kaltura Personal Capture User Guide available in the Kaltura Knowledge Center or check out our various training videos available on the Kaltura Learning website.
